

MONOSTAR GAUGE (WO-81)

This product is highly sensitive precision low differential pressure gauge. Handling is easy, make use of industrial measurement and high level physics and chemistry measurement. Measurement of the pressure, The velocity of the moving fluid and the flow rate is easy.

- **Model** : F (Surface mounting) PC (Flush mounting/circle)
PR (Flush mounting/square)
- **Measurement range** : 0~10,000mmH₂O (Kpa · pa)
《0~5 · 10 · 20 · 30 · 50 · 100 · 200 · 300 · 500 · 1,000
2,000 · 3,000 · 5,000 · 10,000mmH₂O (Kpa · pa)》
- **Applicable gas** : Air or non-Corrosive gas
- **Ambient temp.range** : -10°C ~ 50°C
- **Fixtures** : Vinyl tubing inner diameter φ 6mm (standard)
or Metal tubing outer diameter φ 6mm.
